Accra, Ghana

PROFESSIONAL SUMMARY

Results-driven full-stack software engineer with 5+ years of experience building and shipping production-grade web applications across government, enterprise, education, and telecommunications in Ghana.

Specialises in PHP, Laravel, Vue.js, and PostgreSQL — with a track record spanning national government registries, multi-module ERP systems, EdTech platforms, and USSD service integrations.

Adept at server administration, AI-assisted development workflows, and delivering end-to-end solutions under real-world constraints. First-Class BSc. Computer Engineering graduate from KNUST.

TECHNICAL SKILLS

Languages	PHP · JavaScript · Python
Frameworks	Laravel · Vue.js · Livewire · FastAPI · Flask · Django
Frontend	HTML & CSS · Tailwind CSS · Bootstrap · jQuery
Databases	PostgreSQL · MySQL
Integrations	USSD (MTN · Telecel · AirtelTigo) · SMS / Kannel / Deywuro · MoMo Payment · REST APIs · WebSockets
DevOps	Linux / CentOS / Ubuntu · Nginx · Apache · Git · Server Admin
AI Dev Tools	Cursor · Claude AI · Gemini · Prompt Engineering
Learning	React.js · Tailwind CSS (advanced)

PROFESSIONAL EXPERIENCE

Software Engineer

Npontu Technologies · Accra, Ghana

May 2021 – Present

- Led backend development for Ghana's national Birth & Death Registry Platform — an API-based system with a full frontend, serving citizens across all regions.
- Core engineer on NYMZIE EdTech platform: video assessments, gamification (XP, streaks, leaderboards), multi-portal architecture for students and educators.
- Built a Ghana-compliant payroll module for the Kedebeh ERP covering PAYE, SSNIT, and three-tier reporting (compliance, operational, analytics).

- Contributed to the Blackstars Ghana 2026 FIFA World Cup Raffle — affiliate tracking, partner embeds, and real-time draw management.
- Developed USSD flows across MTN, Telecel, and AirtelTigo for CSSPS, ICGC, Watered Gardens, Teleios, and Tagoe Sisters Concert.
- Added new features to Deywuro, a legacy enterprise SMS platform used by high-volume clients.
- Updated G-Money administrative dashboard with a live transaction tracking system.
- Delivered Laravel/PHP administrative portals and client applications for Kinapharma, TotalEnergies, CSSPS, and GPRTU.
- Administered CentOS and Ubuntu servers — hosting, deployment, log analysis, and issue resolution.

Technologies: [Laravel](#) · [PHP](#) · [Vue.js](#) · [PostgreSQL](#) · [MySQL](#) · [USSD](#) · [Python](#) · [WebSockets](#) · [Linux](#)

Cloud Service Engineer (National Service Personnel)

Aug 2020 – May 2021

[Npontu Technologies](#) · *Accra, Ghana*

- Administered Kannel SMS gateway for high-volume client SMS processing — configuration, maintenance, and log interpretation.
- Hosted and managed web applications on CentOS 7 and Ubuntu Linux servers.
- Built an SMS campaign reporting tool in Python / Django for retrieving and presenting client periodic data.

Technologies: [Kannel](#) · [Linux](#) · [CentOS](#) · [Python](#) · [Django](#) · [SMS Gateway](#)

Class Teacher

Aug 2015 – Jul 2016

[Brighter Light Preparatory School](#) · *Zenu, Ashaiman*

- Taught primary school students, developing strong communication, organisation, and leadership abilities prior to university.

KEY PROJECTS

Birth & Death Registry Platform (HBDRP)

Jul 2023 – 2024

National-scale API-based government platform for registering births and deaths across Ghana, with a full frontend interface for registry officers and citizens.

Stack: [Laravel](#) · [PHP](#) · [PostgreSQL](#) · [REST API](#)

Kedebah ERP — Payroll · HRM · PIM · Project Tracker

2022 – Present

Multi-module enterprise ERP system (8+ modules) covering payroll, HR, product information, procurement, CRM, wholesale, retail, and warehouse management.

Stack: [Laravel](#) · [Vue.js](#) · [PostgreSQL](#) · [MySQL](#)

NYMZIE EdTech Platform

2024 – Present

Educational technology platform with video-based assessments, Duolingo-style gamification, and a multi-portal architecture supporting students and educators.

Stack: [Laravel](#) · [Livewire](#) · [PostgreSQL](#) · [WebSockets](#)

Blackstars World Cup Raffle

2025 – Present

Raffle management system for the Ghana 2026 FIFA World Cup campaign — affiliate tracking, partner embed integration, and a real-time draw engine.

Stack: [Laravel](#) · [Vue.js](#) · [PostgreSQL](#)

Ghana Knowledge & Skills Bank

Jul 2023 – 2024

Digital knowledge repository for students, educators, and researchers to publish and consume educational content nationally.

Stack: [Laravel](#) · [Vue.js](#) · [PostgreSQL](#)

Electricity Consumption Monitoring System (Final Year Project)

Oct 2019 – Jun 2020

IoT-based electricity monitoring system designed and built as a final year project at KNUST under the supervision of Dr. Eliel Keelson.

Stack: [IoT](#) · [Embedded Systems](#)

EDUCATION

BSc. Computer Engineering — First Class Honours

Sep 2016 – Jul 2020

[Kwame Nkrumah University of Science and Technology \(KNUST\)](#) · *Kumasi, Ghana*

- IoT Internship supervised by Dr. Eliel Keelson — Computer Engineering Dept., KNUST (Jun – Aug 2019)
- Final Year Project: Electricity Consumption Monitoring System — supervised by Dr. Eliel Keelson
